## Remodeling Steps:

### **CUSTOM TOUCH CABINETS** RECOMMENDED SUGGESTIONS FOR GETTING YOUR CABINET PROJECT STARTED.

#### *1. Convey your style.*

A great way to start a cabinet project is to begin compiling notes, magazine pictures, searching the internet and noting things you liked or have seen in other people's homes. It is very helpful to have a basic style in mind but if you are struggling to come up with a style our showroom and team can give you lots of ideas on the different styles and cabinet types that are available.

#### *2. Family meeting.*

A crucial yet often overlooked consideration when have a room customized is the needs of the entire family. The whole family will be living with the finished product for years. By getting everyone's thoughts, wishes, and ideas about the project, the design process goes all the smoother.

#### *3. Layout your budget.*

A custom kitchen or bathroom can be created with affordability in mind. Knowing your budget will assist our designers when selecting your cabinet type, material, or even the layout.

#### *4. Start with rough ideas*

Rough sketches of your floor plan and measurements can help with designing your layout. The measurements do not have to be exact. But it is good idea to have a rough sketch of the dimensions and shape of the room to get started on the basic floor plan. The rough can help our designer come up with additional ideas for the layout, form, and function of the cabinets. Please be aware that before we manufacture any cabinets, a professional will come to your house and take a complete set of measurements that will be used for the installation.

#### *5. Call in the professional.*

Call ahead to schedule an appointment.

Part of custom cabinet installation is being able to take advantage of our years designing, customizing, and working with families to create a custom design that looks great and is extremely functionally.

The key to a successful design is understanding the different options that are available to you. There are a wide variety of choices when it comes to different cabinet styles and materials.

We will review and help you establish a budget.

We will discuss your floor plans, how the room will be used, ideas to maximize storage space, make full use of floor space and help with additional design ideas.
